

## **Marine Taxonomist/Biologist**

Precision Marine Survey Ltd specialise in marine environmental monitoring, assessment and macrobenthic invertebrate identification with projects covering a wide range of coastal, offshore and estuarine habitats from around the UK for both commercial developments and conservation assessments. More details and company information can be found on our website [www.precisionmarine.co.uk](http://www.precisionmarine.co.uk).

We are currently looking for a marine biologist with experience in macroinvertebrate taxonomy to join our environmental monitoring team. The primary role will be to assist in taxonomic identification of benthic samples from around the UK in addition to providing support for field surveys and subsequent analysis. Whilst the position will primarily be laboratory based the candidate will also be expected to participate in marine survey activities in addition to assisting with data analysis, GIS and reporting in relation to a range of marine environmental assessments.

The successful candidate should be educated to at least degree level with a background in marine biology and should have recent experience in marine invertebrate taxonomy. The post will require a motivated individual capable of working to tight deadlines. The candidate would ideally have at least two years experience in marine taxonomy although some training can also be provided in-house. Some experience in statistical analysis, GIS, report writing and marine fieldwork would be advantageous.

To apply please e-mail [info@precisionmarine.co.uk](mailto:info@precisionmarine.co.uk) with a covering letter and a copy of your CV.
