

ENV154: Senior Renewables (Marine or Onshore Wind) Consultant:

Royal Haskoning is a Multi Disciplinary Consultancy with 4,400 staff operating in over 50 countries world-wide. We undertake a wide range of high profile, technically demanding projects and have developed a reputation for technical excellence, innovation and project delivery and being an employer of choice.

We are looking for a Senior Renewables Consultant (specialising in either marine or onshore wind) to be responsible for the successful management and effective delivery of EIAs for renewable projects. The ideal candidate will have a strong track record in consultancy and be able to work well within client focused project and technical teams. As a full-time member of the development team, the EIA project manager will oversee all aspects of procurement, technical input and report preparation, as well as results focused financial management and stakeholder liaison. The work will include managing your own projects (with extensive client interaction) and provision of senior support on a wider range of aspects of the business.

The ideal candidate will have experience in the renewables industry, preferably in the wind farm sector. The candidate must have proven project management and delivery skills and be capable of coordinating and leading multidisciplinary teams.

This position offers excellent opportunities for a dynamic and commercial aware individual, who can work well within the client's objectives. We offer a competitive salary plus a range of benefits including a contributory pension, discretionary company bonus, health and dental care, life insurance, 25 days holiday and a flexible working policy.
